

Capability Statement

At Trusted Consulting Solutions, We design, implement, and maintain advanced security architectures, providing end-to-end protection and resilience against evolving cyber threats.

Core Competencies

Enterprise Security Engineering

- Strategic Planning
- Policy Development
- Advanced Cyber Threat Technologies

Network Security

- Intrusion Detection
- Security Audits
- Security Policy Development
- Incident Response Plans

Cloud Security

- Data Protection
- Identity and Access Management (IAM)
- Shared Responsibility Model

Security Assessment

- Vulnerability
- Compliance

Differentiators

- **Cybersecurity Integration** - Extensive 25-year background in seamlessly integrating cybersecurity measures within Linux environments, fortifying systems against evolving threats. Ability to design and implement comprehensive security strategies, encompassing network hardening, access controls, and encryption protocols.
- **Incident Response Mastery** - Expertise in developing and executing robust incident response plans, swiftly mitigating cyber threats and minimizing potential damage to Linux-based infrastructure. Track record of leading incident response teams, conducting thorough post-incident analyses, and implementing preventive measures for future resilience.
- **Security-Driven Linux Architecture** - Adept at architecting Linux systems with a security-first approach, incorporating industry best practices to safeguard against vulnerabilities and unauthorized access. Specialized in the implementation of security-enhancing technologies such as SELinux, ensuring a proactive defense posture for critical IT assets.

Past Performance

- GDIT
- Mantech
- Oracle
- Cybaris Consulting
- Elite Technical

Sample Project

- Design secure Linux infrastructure
- Design secure AWS infrastructure
- Design Tenable.sc and Tenable.io
